WE CAN TACKLE THIS

WE'VE ALREADY MADE HISTORY AND WE'RE DETERMINED TO CHANGE THE FUTURE.

In its inaugural year, The AutoNation Cure Bowl, presented by Florida Hospital raised a record breaking \$1.15 million for the Breast Cancer Research Foundation (BCRF). This donation is the highest amount given in the history of college football bowls from a single bowl to its cancer research foundation/charity partner. Our partner, BCRF has earned a 100% rating score from Charity Navigator for Accountability & Transparency and an A+ from Charity Watch with 91 cents on every dollar received routed directly to research.

Orlando is already a record-breaking leader in tourism, with more than 62 million visitors to the area each year. Over the past decade, Orlando has also developed a Life Sciences & Healthcare cluster which is expanding at exponential rates, making it an emerging leader in medical research and development and an ideal host city for a bowl game whose mission is to raise funding, awareness and support for cancer research.

The AutoNation Cure Bowl, presented by Florida Hospital is an annual NCAA college football bowl game played in December at the Orlando Citrus Bowl and televised nationwide on CBS Sports Network. It's in support of the women who are living with breast cancer today and those who may face it tomorrow. It's a memorial of those who have lost their battle. And it's hope for those who fight to survive — a rally cry to the world to raise awareness and help bring an end to this deadly disease once and for all.

The Orlando Sports Foundation is committed to bringing teams together to find a cure for cancer and we invite you to become a part of the roster. There are several ways to join our team of partners through sponsorship, tickets, membership, donations and more. It's more than just game day. We can change the future together — for life.

THE CANCER ASSASSIN

91 CENTS ON EVERY DOLLAR RAISED GOES TO FIGHT CANCER.

That's what The Breast Cancer Research Foundation calls doing what's right. There's no time to lose in the battle with breast cancer. Delivering funding to the researchers on the front lines of the battle is critical. Local Research Team Leader, Annette Kahled, PhD, is an Associate Professor at the Burnett School of Biomedical Sciences College of Medicine, University of Central Florida. Her team is already putting funds to work right here in Central Florida on cutting edge research for curative therapy. Currently, when a person is treated with cancer, it is generally handled through radiation or drugs. However, often times the cells come back and begin to move and those cells that remained behind migrate to other organs or bones and cause damage, and eventually death. Dr. Kahled and her team are developing a therapy that prevents cells from moving from one point to the other to rid of the migratory cells in the beginning so that a person may not develop cancer later on in life. Dr. Kahled is a hometown hero in the fight against breast cancer and an example of how the AutoNation Cure Bowl fulfills its mission.

“IT’S BIGGER THAN GAME DAY. WE’RE IN IT FOR LIFE.”
